The feelings take over the meaning

The other in space and time of my words on the screen

This text started with a collection, made by Annie, of phrases from : *Dancing Dead or Alive: Useless Bodies as Resistance within Necropolitical Web Choreographies*, Renee Carmichael https://unlikely.net.au/issue-01/dancing-dead-or-alive

Body to body combat is replaced by [illegible] is gone to the milonga
rithms of social dancing feet kick, hug, do you want to dance symbol across the dance floor of the milonga
flyink
drones.....droning out the sound of action
DROWNING

) At the same time, codes are written by people who have biases. In the end who is who and which body is which? The biases are woven into our bodies, brains and the codes. And our bodies are woven into the codes.

They still have a hardcoded menu of identity, but that identity is merely a ghost pushed to the millionth page of a google search. I love this Only the dream of becoming survives. But why 'merely', I mean not being findable by a search engine doesn't negate our existence, perhaps it's the place to be (or not be to dance or not)
Hardcoded =? We show it's not hardcoded when we dance fall fall
the body is only made of softness? or is it also hard like the keyboard I am typing now or the cold screen that glimmers back at me as the words move across the page? Body is not real. explain please? I agree, well it is not what we perceive it to be. Is dance real? Dance is not

Just as a rhythm of movement, a dance style, is unique to a body, with habits and all, death is a unique sensation that only the body alone can experience no! because when you're dead you don't feel? but that moment just before:

to be.

OR..... DIE DANCE

_
not to be.

can it feel something? is?

INTO

DEATH

in a certain and specific time of coupling of 0s and 1s dancing in love as a couple. It is time to wake that body up to rhythms of resistance.
dance <=> death a strange couple how to ~~conjure~~ one by another? don't want the impossible - accept the stillness, the nothing

not to be.
dance (((=)))))death
the dancing plague of 1518, Strasbourg. Were you there, my ghost?
Ghosts cannot or don't want to leave/live. is this a kind of resistance ?
Feeling the invisible of the ghostly limb of my computer, who executed who anyway?
horror
the definitions of choreography are changing so that dance is separated from
chorea graphy, and chorea graphy /// graphie /// script ...omo can be
seen as "an organization or composition, rather than just a physical
activity of the body" (147). This allows choreography to be taken away and
towards and from and in the body and into and ontop and with the computer.
Choreo graphy is a set of structures just as codes are instructions as well. At a practical level,
design itself is starting to see the webpage as **movement**, as a stage not on a stage Choreography is
automation, anyone can download, modify, opensource choreography. Hajikata.jsANY or ONE?!! allllllllll - -
Paik installed Cunningham in his video - - - ###synthesizer.

Rather than being a star, going retroviral, feeding into the loop, the body ~~should~~ instead use the other to become nameless, "...to withdraw oneself from the corralling function {{{{{{{ naming }}}}} that imprisons and domesticates both humans and animals into their absurd mode of co-existence, is to open up life's horizon" (Lepecki, *Singularities* 108). functioning as still function ing as still functioning BUT A MACHINE as still functiontiong as my limbs seem to get into the rhythm as still functioning as still functioning as still functioning as still functio'ning as, are we dreaming yet? - *fluidity* - - - - - - - - - - - - - - - - - - -
